

Report 2: Assets Under Management (AUM) Snapshot, Totals and Averages

Generated: 2026-02-26 01:29

This report estimates assets under management (AUM) using the holdings table as a snapshot. It pulls the most recent holdings 'value_as_of_date', sums the USD value across all holdings at that date, then calculates averages per active client and per active account. The result gives Wilson Financial a quick, defensible baseline for client profitability analysis, capacity planning, and evaluating whether the current billing approach should be adjusted (for example, to better match fees to portfolio size).

Metric	Value
Holdings snapshot date (value_as_of_date)	2026-02-01
Total active clients	6
Total active accounts	6
Total assets (USD)	\$78,585.00
Average assets per client (USD)	\$13,097.50
Average assets per account (USD)	\$13,097.50
