

Report 3: High-Transaction Clients (More Than 10 Transactions in a Month)

Generated: 2026-02-26 01:29

This report identifies clients who place a heavy operational load on the firm by finding any client who exceeds 10 transactions in a single month during the last six months. It is useful for understanding where staff time is being consumed (trade processing, client calls, paperwork, follow-ups), and it can support future decisions about service tiers, workload balancing, and whether a revised billing structure should account for transaction volume.
